

Service portfolio

From the project idea all the way to innovation

We identify the funding programme that is optimally suited for your RDI project:

- information and funding advisory services on Bavarian, German and EU funding programmes
- we act as a project administrator ourselves and we fund scientific and technological research ventures in Bavaria (individual projects, cooperation projects and research associations)

We assist you in project initiation and application submission:

- set-up of national and international research consortia
- bringing together science and industry
- targeted search for cooperation partners, particularly at international level
- assistance with funding application drafting and contract preparation with the European Commission

We support you with the implementation of RDI projects:

- project management and dissemination of results
- management of funded network structures from science and industry

All the way from research results to the final product – our offer:

- presentation of your developments on our congresses and forums and on joint booths during high-tech trade shows
- information on patent law, financing and start-up
- access to innovative technologies and advice on patenting and marketing your inventions

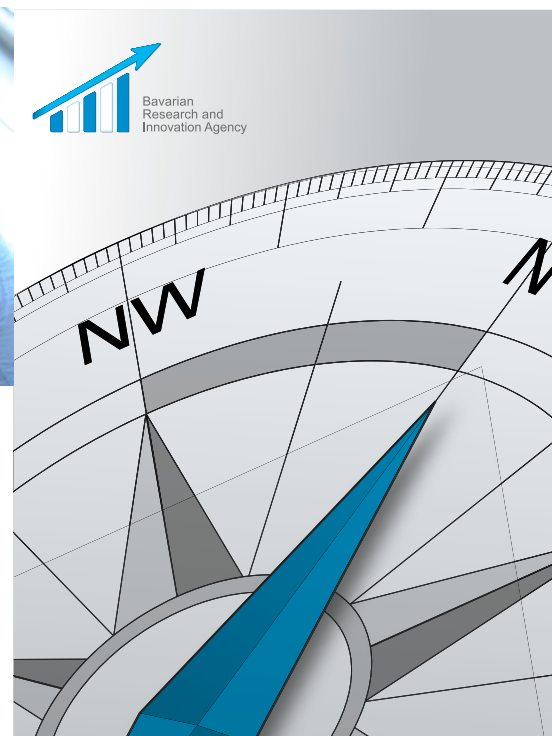

Expertise & competence concentrated at two locations

Bavarian Research and Innovation Agency
Am Tullnaupark 8
90402 Nuremberg

Bavarian Research and Innovation Agency
Prinzregentenstraße 52
80538 Munich

Setting your project on course for success!

Bavarian Research and Innovation Agency

bayern innovativ

Your point of contact for research and innovation

When it comes to turning your innovative project ideas into reality, we are your first point of contact in Bavaria.

Competence⁴

Four partners offer you a comprehensive service and consulting portfolio, covering research and innovation funding, knowledge and technology transfer, patents and licences.

A strong network for your success

From project idea to marketing – expand your network with us and find the partners you need!

Four competent partners

The Bavarian Research Alliance (BayFOR) GmbH

advises and assists scientists from Bavarian universities and stakeholders from the industry as well as municipalities and local authorities with acquiring EU funding for research, development and innovation projects - from project conception to implementation.

BayFOR also provides support for collaboration in science and technology with Québec, Alberta, Israel and Africa. In addition, BayFOR manages the Bavarian Funding Programme for the Initiation of International Projects (BayIntAn), which establishes and strengthens research cooperation projects between Bavarian state Universities and Universities of Applied Sciences and their international partners.

The Bavarian Research Foundation

provides funding for application-based research projects that can only be successfully managed through close collaboration between business and science. The funding allows universities, non-university research institutes and companies to cooperate, in order to perform fundamental research and development work, before applying the results in new products, processes and technologies. The foundation also provides grants to researchers, doctoral and post-doctoral students for international cooperation.

The Bayerische Patentallianz GmbH

(BayPAT) is one of the largest technology transfer centres in Germany. It supports and markets inventions from 25 higher education institutions in Bavaria. With its expertise and many years of experience in the patenting and licensing of technologies and early-phase funding for inventions, BayPAT provides excellent support. As a partner in the WIPANO programme, BayPAT also advises small and medium-sized businesses on issues related to patents.

The Bayern Innovativ GmbH

connects, supports and advises businesses, scientific institutions and organisations within Bavaria.

Bayern Innovativ focuses on accelerating innovations and sharing knowledge. This is achieved through a series of clusters and innovation networks in key areas like digitalisation, energy, health, material and production, mobility, and the cultural and creative industries, along with Thinknet Bayern.

With guides for starting businesses and securing funding, a network of experts, and a hotline to the Bavarian Research and Innovation Agency, Bayern Innovativ is the central contact point and network hub for partners in the ecosystem. It is also the main project sponsor for Bavaria, with a funding volume of over 160 million euros.
